What are some features that you would like to see from this new website that would be beneficial for your organization or your work?

18 responses

Opportunities to spread the work about FoodShare Bamberg and a link to our site for ordering.

Our program information shared on the community website

Resources by County, Partnership opportunities for local organizations, referrals and Events (also having a mobile app would be helpful as well)

Available resources per service site, referral process

Easy to navigate for families looking for youth programs.

Ability to click on an agency's name or website address and be able to access information about their services, contact information, and services provided.

Links to local resources for families in need

A gallery of our best features, contact information, Grant information ,current events, a list of who is who and how they can be reached.

The Golden Harvest Food Bank website has a helpful tool called the "meal finder map." It maps out all of our partner food providers across our 25-county service area, their address, their days and hours of operation, and their contact information. It would be very helpful if this website had something similar for all available resources in the area.

Senior demographics

Some features that could be beneficial on the United Way website for a nonprofit agency include: 1. **Volunteer Matching***: A system to connect volunteers with opportunities based on their skills and interests. 2. **Resource Library***: A comprehensive library of resources, toolkits, and guides for nonprofits. 3. **Newsletter Signup***: Allow visitors to subscribe to updates and newsletters. 4. **Impact Stories***: Showcasing success stories and the impact of donations and volunteers.

Direct link to resources the individual is searching for

direct link to our website

Have pre-enrollment forms available to have Seniors interested in SCSEP training program access to apply. General information about what the SCSEP program is.

integration of data collection and analysis, shared referral support

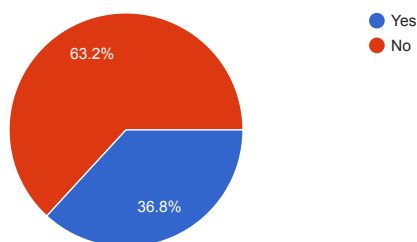

unsure

A page that lists the hunger resources available in the region served. We have a number of partner agencies in the ABB area and can provide their operating hours.

Recruiting

Are there any paper forms that you are currently using that could be put online or could be integrated into this website? [Copy](#)

19 responses

If Yes, please provide a short description of the form.

10 responses

N/A

Grant applications

We have a program application and also flyers

Application for food assistance

We do have some online links, such as beascout.org that helps new families find and join a local Pack or Troop.

Health Learners consent is a 2-page document with demographics and consent for transportation included.

most all our forms are on our website

SCSEP training program pre-application form. Just basic information request.

intake for referral for services

Contact forms

Briefly describe how having this web resource can help your organization and the people you serve.

We are always trying to reach the SNAP customers that need the \$5 purchase price opportunity to have fresh produce.

By allowing the word and the services that we provide to the out of school youth to be broadcasted in a larger area. To allow individuals to know that we are here and that we are a benefit to the community

It would increase our outreach efforts to help those in need

Continuity of care between service providers

It can make it easier for families to find us, and get contact information from us.

I see this website as serving as a resource for community members to easily access needed services.

It can help connect families in need to local recourses.

Just letting people know we are here and what we Provide.would Improve our attendance..In doing so we maybe able to save one more child.

I believe the more resources are communicated to the public, the more they will be used. Additionally, we as providers can learn a lot from the other end in seeing where needs are highest and what type of needs are in high demand.

It would allow us to provide our clients with additional resources.

Having access to the United Way web resource can benefit our housing non-profit by providing valuable information on funding opportunities, community resources, best practices, and networking opportunities. This can help our organization in securing funding, improving services, and expanding our reach to better serve the people in need of housing assistance.

One of our ongoing challenges is the ability to get our consent form completed and in our hands. Having this available on the site will be greatly beneficial. Also knowing that the families we serve have access to other resources they need will be a great benefit to them.

it will provide direct/easy access to many UW partner agencies

Fing seniors in the community that would be a good fit for our program.

Communication of service availability, eligibility, location for benefactors and services organizations as well as the general public.

if organizations give information about how they help and who they help, it will make it easier to find the appropriate referral source when needed.

Our goal is to support the local hunger relief agencies that serve the Allendale, Bamberg, and Barnwell communities. By directing people in need to their closest available food pantry and supplying the operating hours for each, the website will make it easier for people in crisis to access those resources.
